

Activation Guide

1. License Types

- **Demo Version**
 - Noise will be inserted every 30 seconds.
 - A “DEMO” watermark will be displayed on the screen.
- **Full Version**
 - All features are available without limitations.
 - No noise or watermark will be displayed.

2. Preparing for License Input

- After purchase, you will receive a **serial key** via the registered email address.
- The serial key format is as follows:

<ProductCode>-XXXX-XXXX-XXXX

Example: SE-1234-5678-90AB

Characters easily confused such as “O/0” and “l/1” are not used.

3. License Input Procedure

1. Launch the plugin. The license input window will appear.
2. Enter the following two items:
 - Email address (the one used for purchase)
 - Serial key
3. Press the [Enter] button.
 - If the input is correct, activation will complete and a license file will be saved.
 - From the next startup, the plugin will launch in full version mode.

4. Using the Demo Version

- Press the [Try Demo] button to continue using the demo version.
- While in demo mode, you can click the “DEMO” watermark to reopen the license input window.

5. License File Location

Once activation succeeds, the license information will be saved in the following locations:

- **macOS** ~/Library/Application Support/BlackArtsTechs/<ProductName>/License.json
- **Windows** %APPDATA%\BlackArtsTechs\<ProductName>\License.json

6. Troubleshooting

- **Serial key not recognized**
 - Please double-check the input (case-sensitive).
- **License input window does not appear**
 - A license file may already exist. Check the location above.
- **Using on another PC**
 - You can activate again with the same email address and serial key on a new PC.

7. Support

If the issue cannot be resolved, please contact support:
